

HMPE Synthetic Soft Shackles

Jeyco's synthetic soft shackles remove the need for hazardous, heavy, labour intensive steel connecting hardware from towing systems. Our synthetic soft shackles are manufactured in-house using HMPE (high modulus polyethylene) and can be customised to meet any MBL or length requirement.

Synthetic soft shackles are lighter and easier to handle making them safer and faster to use in the field over traditional steel shackles and eliminates potential projectiles from towing systems. Soft shackles are an effective way of connecting rope without the need for splicing or on-site rope technicians.

Features

- Lightweight & Flexible construction
- Buoyant in water
- Offered in fully customizable lengths & MBLs
- Optional safety loop in knot
- PTC & SX Gard Jacketing options available for higher durability
- Diamond knot to secure self-tightening loop into place

MBL	Closed Length	Single Pass	Double Pass	Triple Pass
Tonnes (Te)	Metre	Rope Size (mm)		
5	0.1	6	4	3
10	0.1	9	6	5
15	0.2	11	8	6
20	0.2	12	9	8
25	0.2	14	9	8
30	0.3	15	11	9
45	0.3	18	12	11
60	0.4	20	15	12
70	0.4	22	17	14
80	0.5	24	17	14
90	0.5	26	18	15
100	0.5	28	20	17
125	0.5	32	22	18

MBL	Closed Length	Single Pass	Double Pass	Triple Pass
Tonnes (Te)	Metres	Rope Size (mm)		
150	0.5	36	24	20
175	1.0	40	26	20
200	1.0	44	28	22
250	1.0	48	32	26
300	1.5	52	36	28
400	1.5	60	44	36
